

①

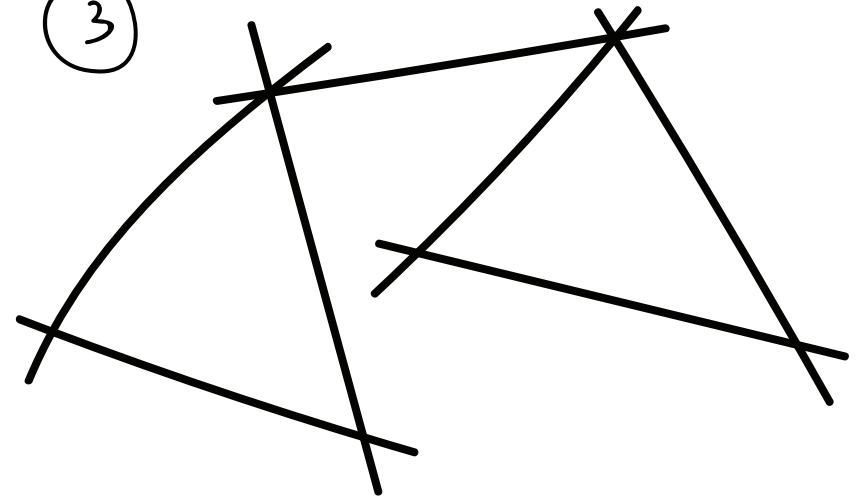

Step 1 - Take the two dowels and glue the tops together leaving some room at the top to make a v shape. When you do the second side do it on top of the first one so the dowels that lay across are somewhat level.

②

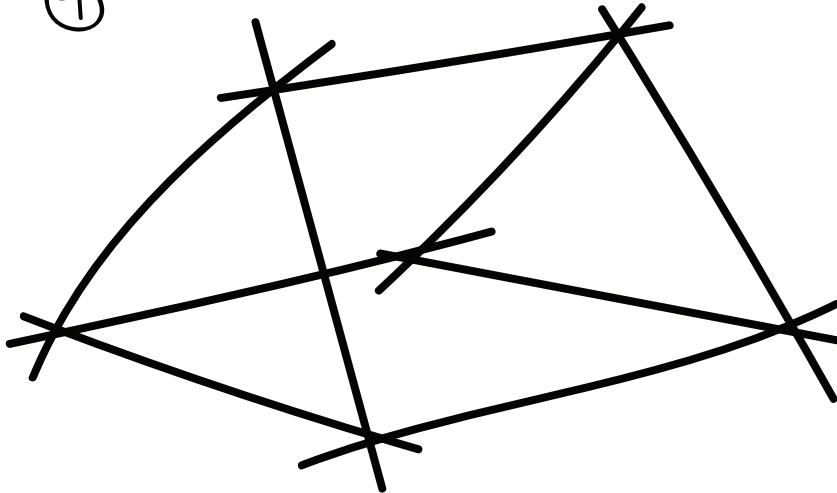

Step 2 - Add your bottom dowel making a triangle. When doing the second side lay it on top of your first one so they match as much as possible.

③

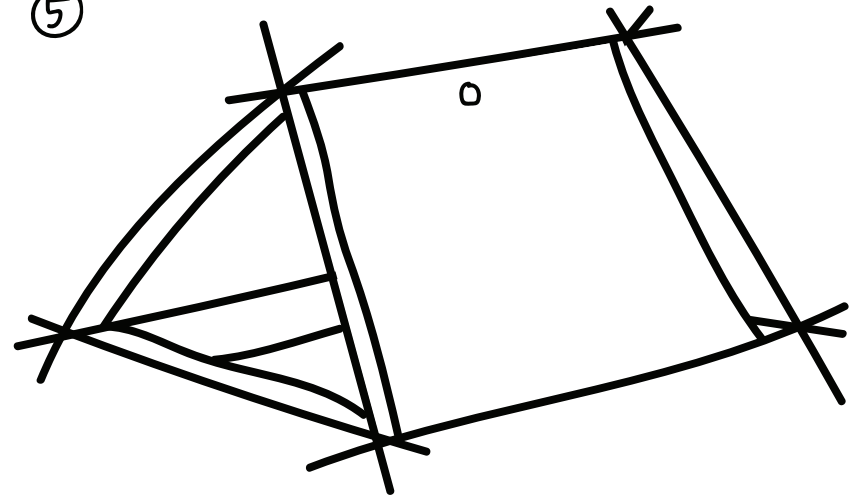

Step 3 - Add your top dowel making the bridge between the two sides.

④

Step 4 - Add your two bottom dowels connecting the two sides from the bottom.

⑤

Step 5 - Add your fabric. Wrap fabric around the top dowel and the two bottom dowels and have the seam meet on the bottom. I used a hot glue gun to keep the seam together. Punch a hole at the middle/top for the balloon ribbon to go through.
